2910
gris clair

polaris, come la luce confortante della stella polare, rappresenta un punto fermo, di arrivo, una superficie "altra", profonda e piena. il colore risulta "fondente" per un sicuro effetto innovativo e immaginifico. polaris è in testa ai prodotti di ultima generazione e costituisce un riferimento sofisticato e durevole per i progettisti più curiosi che desiderano una resa inedita.

like the comforting light of the north star, polaris, the "alternative" rich and deep surface represents a point of arrival. its mellow colour provides an undoubtedly innovative and imaginative effect. polaris leads the category of latest generation products, serving as a sophisticated and durable reference point for inquisitive designers who seek unusual results.

caratteristiche tecniche

caldo e vellutato al tatto - anti-impronta
resistente ai graffi - resistente al calore
resistente all'urto - antibatterico
idoneo al contatto con gli alimenti

technical features

ultra warm and soft touch - anti-fingersprint
scratch resistant - heat resistant
shock resistant - anti bacterial
suitable for applications in areas
in contact with foodstuffs
